

Financial Training & Development

A good finance director should be trying to coach the team, and pass on finance skills to others in the business. This could involve interpreting & understanding a set of financial statements, or considering if the purchase of a new piece of machinery makes financial sense, or considering how your company cash flow may look over the coming three, six or twelve months, or forecasting the likely trading performance of your business.

If you are running a business, responsible for divisional performance or seeking a role with P & L responsibility, having some good financial skills to help you achieve this and do well is imperative.

The team at Rubycom have developed a series of finance related training courses and seminars to assist people with a non finance background understand and confidently discuss finance materials, whether that be a profit and loss account, balance sheet, cash forecast, budget, capital investment appraisal or something else.

Using real examples, many of which taken from our own personal experience, Rubycom can give you the skills and confidence to use and understand financial information to better your business and Improve Financial Performance.

Objectives, deliverables and expected outcomes are agreed prior to commencing with any of the above. All of the above courses are delivered by one of Rubycom's experienced finance directors, with much emphasis on real life scenarios.

The courses noted above can be tailored to your needs or for the needs of your group or company.

All of the above can be delivered virtually via Zoom or live face to face. We will agree the delivery format with you.

A comprehensive set of notes is included with all of the above courses.

These can be delivered in multiple short sessions (for example over 12 weeks for one hour per week), or two afternoons, whole days or even over breakfast to start your day. We will discuss this and agree the timings with you.
